History

The Soave family originated from the town of Cassino, not far from Rome. Like many Italians of the same generation, the family made the decision to go in search of a better life, and in 1914 emigrated to the “sunnier climes” of Scotland!

The family cafe and Ice Cream business began in Coatbridge, Lanarkshire, and remained there during the first half of the century.

In the early 1950's, “Uncle Angie” purchased ‘Muirhead Cafe’, and it is on this same site that Eric Soave, having taken over the mantle of his much-loved uncle in 1972, later constructed a modern plant from which he continues to produce the award winning ice cream. It was at this time that the now famous Soave recipe was perfected.

While the company has moved with the times in terms of technical advances in the ice cream making world, they have resisted the temptation, in these commercial times to alter the original family recipe. Distributing widely throughout Scotland, we produce a vast selection of flavours from which Raspberry Ripple, Traditional Scottish Tablet, Honeycomb Sensation and of course, the unequalled Vanilla Royale, rate among the favourites!

About Us

Soave's Ice Cream is a long established, family owned business involved in the manufacturing and wholesaling of Scottish Italian ice cream, sorbets, frozen yogurt and desserts. The business is currently headed by Eric Soave, and has been running the business since the mid 1980's

The main manufacturing facilities are based in Muirhead, North Lanarkshire. We produce a wide range of ice cream flavours & products for wholesale and retail customers. In recent years, we have produced new unique selling products including Ice Cream filled snowballs, Ice Cream filled sponges, dairy free sorbets and in the last year, fat free frozen yogurt.

We offer direct delivery to a large network of shops and ice cream parlours throughout the central belt of Scotland. Achieved using our refrigerated vehicles which service the smaller shops and vast selection of ice cream parlours. Our products also reach businesses operating in the food service sector, such as restaurants, through being listed with large distributed wholesalers. This allows our products to supply the whole of Scotland including the highlands and Islands.

By achieving a SALSA food accreditation for several years, this ensures we demonstrate a high standard of food manufacturing compliance.

Creating The Magic

Soave's Ice Cream is made by freezing our 'magical mix', this mix is produced by combining milk, cream and sugar with our secret and special ingredients. It is then heated to a high temperature, pasteurised and cooled rapidly to create the smooth, creamy consistency that we in the trade call, 'liquid mix'.

After ageing the liquid mix for at least six hours, it is frozen down in our state of the art ice cream makers before being packaged in its various forms. Thereafter the ice cream is frozen further in our very low temperature hardening rooms, transferred to our holding rooms and stored at approximately -22°C , ready for distribution to our customers.

And that is how we create the smooth, spellbinding magic...
that is Soave's Ice Cream.

Snowballs & Sponges

Soave's Ice Cream offer unique ice cream filled Snowball and Sponge desserts made from award-winning Scottish Italian ice cream. Each one is individually handmade to ensure the highest quality of product to indulge for any occasion.

Our Ice Cream filled Snowball is made with original vanilla ice cream, covered in a dark chocolate coating smothered in coconut.

Our Ice Cream filled Sponges are made with a rich creamy vanilla royale ice cream sandwiched between soft vanilla flavoured sponges with a rich raspberry flavoured sauce.
